

ADMISSION CRITERIAS FOR EXHIBITORS

Each exhibitor who has cotton and/or organic wool in the offered product range, will need to comply with INNATEX' minimum requirements:

In the total collection 50% of cotton must come from controlled biological cultivation; if (sheep)wool is in the product range, a minimum of 10% must originate from controlled biological animal husbandry. In the total collection 50% of the leather product range has to consist of 50% vegetable tanned leather.

Should you currently not be in a position to meet these requirements, you still have the option of filling in the "application for special authorisation" on the following Admissions Form. In this instance, we require a statement in writing to be enclosed with your application, clearly detailing the reasons why you are unable to meet these requirements at the present time together with a prediction as to when you think you will be able to use the stipulated amounts of controlled and certified organic fibres (kbA/kbT) in compliance the criteria. Please also specify in your declaration your commitment to environmentally friendly and/or socially acceptable textile production, providing us with any certification you may have.

INNATEX will carefully consider each Application for Special Authorisation and decide within a short period whether your company may exhibit at the fair. Please understand that we are required to ask for corresponding proof for reasons of transparency and fairness towards our other exhibitors.

If we wish to maintain our credibility as a sustainable event, it is essential that our exhibitors can guarantee our buyers that the manufacturing processes used are traceable and transparent.

Many thanks for your cooperation!

With kind regards
The INNATEX Team

OVERVIEW OF THE FIBRE REQUIREMENTS FOR INDIVIDUAL ITEMS AND FOR THE PRODUCT RANGE AS A WHOLE

PRODUCT-/ FIBRE GROUP	INDIVIDUAL ITEM	PRODUCT RANGE
Cotton wool fibres	No limitations	At least 50% from controlled and certified organic cultivation based on the cotton range
Sheep's wool fibres	No limitations	At least 10% from animal husbandry based on the sheep's wool range
Other natural fibres (e.g. silk, linen, hemp, alpaca)	No limitations	No limitations
Regenerative fibres Recycleed synthetic fibres (e.g. viscose, modal, lyocell made from bamboo, cotton or wood)	No limitations (but cannot be declared as a natural textile if the regenerative fibre/recycleed synthetic fibre content exceeds 30%)	Together, a maximum of 30% of the textile range on display
Synthetic fibres (e.g. polyester, polyamide, polyurethane)	A maximum of 30%	
Leather	No limitations	At least 50% from vegetable tanned leather

ADMISSION CRITERIAS PRODUCT CLASSIFICATION

MEETING THE ADMISSION CRITERIA IS THE BASIS FOR PARTICIPATING IN INNATEX.

Filling in this form is mandatory for every exhibitor! The exhibitor will not be accepted to take part in INNATEX until the form has been received and the cited admission criteria approved by the organiser. **The admission criteria form is an essential part of your registration to INNATEX and must, therefore, be filled in before EVERY event.** The organiser reserves the right to assign an independent body with verification if the criteria are met. Exhibitors MUST have all certification and verifiable proof available at the stand for inspection at all times. The organiser has the right to order the removal of parts of a collection or the closure of an entire stand at any time. This does not affect the exhibitor's obligation to pay the stand rental due.

TEXTILES AND LEATHER GOODS

Admission criteria for exhibitors offering textiles resp. leather goods:

- The textiles on show must be labelled in compliance with German textile labelling law ("Textilkennzeichnungsgesetz"). In particular the information on the raw materials content must be labelled on every textile exhibit in a clearly legible manner, using the terms for textile fibres as prescribed by the abovementioned textile labelling law. In this context, we would like to point out that regenerated cellulose fibres must be referred to in the official declaration on the content of raw materials exclusively as "viscose" (or modal, lyocell), irrespective of the original basic material (e.g. bamboo, cotton, wood). Such regenerated fibres form their own fibre group alongside synthetic and natural fibres; they may not be promoted as natural fibres.
- The proportion of **natural fibres must amount to at least 70% of the total textile range** on show.
- At least 50% of the cotton fibres and/or 10% of the sheep's wool fibres in the exhibited product range must be made from controlled and certified organic cultivation and/or animal husbandry (kbA/kbT).**
- Items with a more than 30% share of synthetic fibres may NOT be exhibited.** However, if recycled synthetic fibres are used, individual articles with a more than 30% share of these fibres may be exhibited.
- Exhibited items may only be promoted as a **natural textile** if they **have at least a 70% natural fibre content**.
- Leather products must contain at least 50% vegetable tanned leather.** Products made of synthetic leather (artificial leather) or chrome tanned leather may not be exhibited.

Items exhibited solely as samples need not meet these regulations provided the equivalent items produced for sale do comply. In this instance, the composition of the raw material content for both the sample and the product to be sold must be clearly labelled on the exhibited sample.

FIBRE MATERIAL OF THE EXHIBITION RANGE ON SHOW The sum of all fibre materials must be 100%.

- The **cotton and sheep's wool** content of our exhibition range contains **at least 50% certified cotton fibres / 10% certified sheep's wool fibres** from controlled and certified organic cultivation/animal husbandry (kbA/kbT).

Our exhibition range consists of approx. _____% natural fibres.

Our exhibition range consists of approx. _____% regenerated fibres (e.g. viscose, modal, lyocell).

Our exhibition range consists of approx. _____% of synthetic fibres.

Of this total, approx. _____% comprises recycled synthetic fibres.

NATURAL MATERIALS USED

proof must be provided for the content information given below.

- | | |
|--|--|
| <input type="checkbox"/> Cotton (____% from certified organic cultivation) | <input type="checkbox"/> Linen (____% from certified organic cultivation) |
| <input type="checkbox"/> Hemp (____% from certified organic cultivation) | <input type="checkbox"/> Sheep's-Wool (____% from certified organic livestock) |
| <input type="checkbox"/> Silk (____% from certified organic livestock) | <input type="checkbox"/> Leather (____% vegetable tanned leather) |
| <input type="checkbox"/> Blended natural fibres | <input type="checkbox"/> Other (alpaca, jute, ramie, wood, horn, precious metals etc.) |

APPLICATION FOR SPECIAL AUTHORISATION

- Our textile range of cotton and sheep's wool fibres does not yet meet the required composition.** We therefore wish to apply for special authorisation to participate in the exhibition (see leaflet) and, herewith, submit an explanation detailing the reasons why we are currently unable to meet the specified criteria.
